Statement from the Chairman of the Board

At PayLink Merchant Services, we are committed to protecting the information our clients entrust to us and helping them accept payments securely. We limit access to confidential information to authorized personnel and use approved systems and processes to handle sensitive information.

We provide merchant consultancy and services with integrity, discretion, and professional care. We explain the options, costs, and terms clearly so clients can choose the payment solutions that fit their businesses.

We are committed to offering our clients the best rates available through PayLink or our partners for their payment needs. We explain rates, fees, and material conditions before clients commit.

As Chairman of the Board, I expect everyone representing PayLink to uphold these commitments in every client engagement.
